

LÍMITE NORTE 2022

This wine explores the westernmost region of Rioja with two indigenous and rare varieties that thrive in an extreme climate with influences from the refreshing Atlantic. The landscape is shaped by the Obarenes Mountains and the rivers Oja and Tirón, which provide a unique environment. This is the last area to be harvested in Rioja.

TERROIR

The vineyard was planted in 2005 and is located in Cuzcurrita, at a plateau with an altitude of 450 meters. The soil is alluvial, shallow, and covered with stones. The location exposes the vines to constant north winds that help to cool the vineyards, delay the ripening and preserve an optimal acidity.

2022 VINTAGE

The 2022 vintage did not go unnoticed in La Rioja, nor in our Berriquia estate, where Tempranillo and Maturana Blanca are grown. The growing cycle began with an autumn and winter marked by very mild temperatures, but what truly defined the vintage was the extreme drought experienced throughout the region. The successive heat waves made this one of the most challenging harvests, especially for white wine production, where canopy management proved essential to preserve freshness and acidity.

WINEMAKING

Fermentation is carried out in concrete tanks separated by variety. The wine is then aged for six months in different types of material: concrete vats, amphoras, and barrels. After blending, the wine is aged in 225-litre second-use French oak barrels for another six months, followed by an additional 12 months in bottle.

STYLE

It is a wine with refreshing acidity and great aromatic complexity, with citrus, floral, and herbal notes at the forefront, alongside white pepper and tertiary aromas from bottle evolution. It has volume and length on the palate.

PAIRING

A structured white wine, ideal for seafood rice dishes and oily fish, pairing perfectly with sushi, curry chicken, risotto, or creamy pasta.
